Paths

POST /auth/

Parameters

Type	Name	Schema
Body	**data** *required*	AuthToken

Responses

HTTP Code	Schema
201	AuthToken

Tags

- auth

POST /collaboration_invites/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	CollaborationInvitePOST

Responses

HTTP Code	Schema
201	CollaborationInvitePOST

Tags

- collaboration_invites

GET /collaboration_invites/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**from_user***id* optional__	number
Query	**to_project***id* optional__	number
Query	**to_user***id* optional__	number

Responses

HTTP Code	Schema
200	< CollaborationInvite > array

Tags

- collaboration_invites

GET /collaboration_invites/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer

Responses

HTTP Code	Schema
200	CollaborationInvite

Tags

- collaboration_invites

PUT /collaboration_invites/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer
Body	**data** *required*		CollaborationInvite

Responses

HTTP Code	Schema
200	CollaborationInvite

Tags

- collaboration_invites

DELETE /collaboration_invites/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- collaboration_invites

PATCH /collaboration_invites/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer
Body	**data** *required*		CollaborationInvite

Responses

HTTP Code	Schema
200	CollaborationInvite

Tags

- collaboration_invites

POST /collaboration_invites/{id}/accept_collaboration_invite/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer

Type	Name	Description	Schema
Body	**data** *required*		CollaborationInvitePOST

Responses

HTTP Code	Schema
201	CollaborationInvitePOST

Tags

- collaboration_invites

POST /collaboration_invites/{id}/reject_collaboration/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration invite.	integer
Body	**data** *required*		CollaborationInvitePOST

Responses

HTTP Code	Schema
201	CollaborationInvitePOST

Tags

- collaboration_invites

POST /collaboration_requests/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	CollaborationRequest

Responses

HTTP Code	Schema
201	CollaborationRequest

Tags

- collaboration_requests

GET /collaboration_requests/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**from_user*id*** optional__	number
Query	**to_project*id*** optional__	number
Query	**to_user*id*** optional__	number

Responses

HTTP Code	Schema
200	< CollaborationRequest > array

Tags

- collaboration_requests

GET /collaboration_requests/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer

Responses

HTTP Code	Schema
200	CollaborationRequest

Tags

- collaboration_requests

PUT /collaboration_requests/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer
Body	**data** *required*		CollaborationRequest

Responses

HTTP Code	Schema
200	CollaborationRequest

Tags

- collaboration_requests

DELETE /collaboration_requests/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- collaboration_requests

PATCH /collaboration_requests/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer
Body	**data** *required*		CollaborationRequest

Responses

HTTP Code	Schema
200	CollaborationRequest

Tags

- collaboration_requests

POST /collaboration_requests/{id}/accept_collaboration/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer

Responses

HTTP Code	Schema
201	No Content

Tags

- collaboration_requests

POST /collaboration_requests/{id}/reject_collaboration/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this collaboration request.	integer

Responses

HTTP Code	Schema
201	No Content

Tags

- collaboration_requests

POST /comments/

Description

Users can only comment on other user that they colllaborate on a project.

Parameters

Type	Name	Schema
Body	**data** *required*	CommentCreate

Responses

HTTP Code	Schema
201	CommentCreate

Tags

- comments

GET /comments/

Description

Users can list comments that belong to users with public profiles, themselves, someone they follow or comments they created.

Parameters

Type	Name	Schema
Query	**from_user** *optional*	string
Query	**to_user** *optional*	string

Responses

HTTP Code	Schema
200	< Comment > array

Tags

- comments

GET /comments/{id}/

Description

Users can see comments of a user that has a public profile or that they follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this comment.	integer

Responses

HTTP Code	Schema
200	Comment

Tags

- comments

PUT /comments/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this comment.	integer
Body	**data** *required*		CommentUpdate

Responses

HTTP Code	Schema
200	CommentUpdate

Tags

- comments

DELETE /comments/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this comment.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- comments

PATCH /comments/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this comment.	integer
Body	**data** *required*		CommentUpdate

Responses

HTTP Code	Schema
200	CommentUpdate

Tags

- comments

POST /events/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	Event

Responses

HTTP Code	Schema
201	Event

Tags

- events

GET /events/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**event_type** *optional*	string

Responses

HTTP Code	Schema
200	< Event > array

Tags

- events

GET /events/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this event.	integer

Responses

HTTP Code	Schema
200	Event

Tags

- events

PUT /events/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this event.	integer
Body	**data** *required*		Event

Responses

HTTP Code	Schema
200	Event

Tags

- events

DELETE /events/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this event.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- events

PATCH /events/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this event.	integer
Body	**data** *required*		Event

Responses

HTTP Code	Schema
200	Event

Tags

- events

GET /feeds/

Responses

HTTP Code	Schema
200	No Content

Tags

- feeds

GET /feeds/followers/

Responses

HTTP Code	Schema
200	No Content

Tags

- feeds

GET /feeds/timeline/

Responses

HTTP Code	Schema
200	< Feed > array

Tags

- feeds

POST /feeds/unfollow/

Parameters

Type	Name	Schema
Body	**data** *required*	Feed

Responses

HTTP Code	Schema
201	Feed

Tags

- feeds

DELETE /feeds/{id}/

Parameters

Type	Name	Schema
Path	**id** *required*	string

Responses

HTTP Code	Schema
204	No Content

Tags

- feeds

POST /files/

Parameters

Type	Name	Schema
FormData	**file** *required*	file
FormData	**project** *required*	integer
FormData	**remark** *required*	string

Responses

HTTP Code	Schema
201	File

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

GET /files/

Parameters

Type	Name	Schema
Query	**project** *optional*	string

Responses

HTTP Code	Schema
200	< File > array

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

GET /files/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer

Responses

HTTP Code	Schema
200	File

Consumes

- multipart/form-data

- application/x-www-form-urlencoded

Tags

- files

PUT /files/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer
FormData	**file** *required*		file
FormData	**project** *required*		integer
FormData	**remark** *required*		string

Responses

HTTP Code	Schema
200	File

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

DELETE /files/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer

Responses

HTTP Code	Schema
204	No Content

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

PATCH /files/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer
FormData	**file** *required*		file
FormData	**project** *required*		integer
FormData	**remark** *required*		string

Responses

HTTP Code	Schema
200	File

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

GET /files/{id}/download_file/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer

Responses

HTTP Code	Schema
200	File

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

GET /files/{id}/retrieve_file/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this file.	integer

Responses

HTTP Code	Schema
200	File

Consumes

- multipart/form-data
- application/x-www-form-urlencoded

Tags

- files

POST /follow/

Description

ViewSet for follow.

Parameters

Type	Name	Schema
Body	**data** *required*	FollowPost

Responses

HTTP Code	Schema
201	FollowPost

Tags

- follow

GET /follow/

Description

ViewSet for follow.

Parameters

Type	Name	Schema
Query	**from_user*id*** optional__	number
Query	**to_user*id*** optional__	number

Responses

HTTP Code	Schema
200	< Follow > array

Tags

- follow

GET /follow/{id}/

Description

ViewSet for follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this following.	integer

Responses

HTTP Code	Schema
200	Follow

Tags

- follow

PUT /follow/{id}/

Description

ViewSet for follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this following.	integer
Body	**data** *required*		Follow

Responses

HTTP Code	Schema
200	Follow

Tags

- follow

DELETE /follow/{id}/

Description

ViewSet for follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this following.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- follow

PATCH /follow/{id}/

Description

ViewSet for follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this following.	integer
Body	**data** *required*		Follow

Responses

HTTP Code	Schema
200	Follow

Tags

- follow

POST /follow/{id}/unfollow/

Description

ViewSet for follow.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this following.	integer
Body	**data** *required*		Follow

Responses

HTTP Code	Schema
201	Follow

Tags

- follow

POST /follow_request/

Description

ViewSet for follow request.

Parameters

Type	Name	Schema
Body	**data** *required*	FollowRequestPost

Responses

HTTP Code	Schema
201	FollowRequestPost

Tags

- follow_request

GET /follow_request/

Description

ViewSet for follow request.

Parameters

Type	Name	Schema
Query	**req_to_user** *optional*	string

Responses

HTTP Code	Schema
200	< FollowRequest > array

Tags

- follow_request

GET /follow_request/{id}/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer

Responses

HTTP Code	Schema
200	FollowRequest

Tags

- follow_request

PUT /follow_request/{id}/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer

Type	Name	Description	Schema
Body	**data** *required*		FollowRequest

Responses

HTTP Code	Schema
200	FollowRequest

Tags

- follow_request

DELETE /follow_request/{id}/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- follow_request

PATCH /follow_request/{id}/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer
Body	**data** *required*		FollowRequest

Responses

HTTP Code	Schema
200	FollowRequest

Tags

- follow_request

POST /follow_request/{id}/accept_follow/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer
Body	**data** *required*		FollowRequest

Responses

HTTP Code	Schema
201	FollowRequest

Tags

- follow_request

POST /follow_request/{id}/reject_follow/

Description

ViewSet for follow request.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this follow request.	integer
Body	**data** *required*		FollowRequest

Responses

HTTP Code	Schema
201	FollowRequest

Tags

- follow_request

POST /logout/

Description

Logs the user out, has to be authenticated

Responses

HTTP Code	Schema
201	No Content

Tags

- logout

POST /milestones/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	Milestone

Responses

HTTP Code	Schema
201	Milestone

Tags

- milestones

GET /milestones/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**project*id*** optional__	number

Responses

HTTP Code	Schema
200	< Milestone > array

Tags

- milestones

GET /milestones/get_user_milestones/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**project*id*** optional__	number

Responses

HTTP Code	Schema
200	< Milestone > array

Tags

- milestones

GET /milestones/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this milestone.	integer

Responses

HTTP Code	Schema
200	Milestone

Tags

- milestones

PUT /milestones/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this milestone.	integer
Body	**data** *required*		Milestone

Responses

HTTP Code	Schema
200	Milestone

Tags

- milestones

DELETE /milestones/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this milestone.	integer

Responses

HTTP Code	Schema
204	No Content

- milestones

PATCH /milestones/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this milestone.	integer
Body	**data** *required*		Milestone

Responses

HTTP Code	Schema
200	Milestone

Tags

- milestones

GET /notifications/

Responses

HTTP Code	Schema
200	No Content

Tags

- notifications

GET /notifications/admin_list_all/

Responses

HTTP Code	Schema
200	No Content

Tags

- notifications

GET /notifications/all_count/

Responses

HTTP Code	Schema
200	No Content

Tags

- notifications

POST /notifications/mark_all_as_read/

Responses

Tags

- notifications

GET /notifications/unread_count/

Responses

HTTP Code	Schema
200	No Content

Tags

- notifications

DELETE /notifications/{id}/delete/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this notification.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- notifications

POST /notifications/{id}/mark_as_read/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this notification.	integer

Responses

HTTP Code	Schema
201	No Content

Tags

- notifications

POST /notifications/{id}/mark_as_unread/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this notification.	integer

Responses

HTTP Code	Schema
201	No Content

Tags

- notifications

GET /profile_picture/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer

Responses

HTTP Code	Schema
200	ProfilePicture

Consumes

- `multipart/form-data`
- `application/x-www-form-urlencoded`

Tags

- profile_picture

PUT /profile_picture/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer
FormData	**profile_picture** *optional*		file

Responses

HTTP Code	Schema
200	ProfilePicture

Consumes

- `multipart/form-data`
- `application/x-www-form-urlencoded`

Tags

- profile_picture

DELETE /profile_picture/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer

Responses

HTTP Code	Schema
204	No Content

Consumes

- `multipart/form-data`

- `application/x-www-form-urlencoded`

Tags

- profile_picture

POST /profiles/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	ProfileFull

Responses

HTTP Code	Schema
201	ProfileFull

Tags

- profiles

GET /profiles/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**owner*id*** optional__	number

Responses

HTTP Code	Schema
200	< ProfilePrivate > array

Tags

- profiles

GET /profiles/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer

Responses

HTTP Code	Schema
200	No Content

Tags

- profiles

PUT /profiles/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer
Body	**data** *required*		ProfileFull

Responses

HTTP Code	Schema
200	ProfileFull

Tags

- profiles

DELETE /profiles/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this profile.	integer

Responses

POST /projects/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	ProjectPublic

Responses

HTTP Code	Schema
201	ProjectPublic

Tags

- projects

GET /projects/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Query	**members***id* optional__	number
Query	**owner***id* optional__	number

Responses

HTTP Code	Schema
200	< ProjectPrivate > array

Tags

- projects

GET /projects/get_project_recommendation/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Query	**members***id* optional__		number
Query	**owner***id* optional__		number
Query	**user_count** *optional*	Number of projects requested	integer
Query	**user_id** *optional*	User id to get recommendations	integer

Responses

HTTP Code	Schema
200	< [ProjectPublic](#) > array

Tags

- projects

GET /projects/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this project.	integer

Responses

HTTP Code	Schema
200	No Content

Tags

- projects

PUT /projects/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this project.	integer
Body	**data** *required*		[ProjectPublic](#)

Responses

HTTP Code	Schema
200	ProjectPublic

Tags

- projects

DELETE /projects/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this project.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- projects

PATCH /projects/{id}/

Description

Body	**data** *required*	Publication

Responses

HTTP Code	Schema
201	Publication

Tags

- publications

GET /publications/

Parameters

Type	Name	Schema
Query	**owner*id*** optional__	number

Responses

HTTP Code	Schema
200	< Publication > array

Tags

- publications

POST /publications/add_publications/

Parameters

Type	Name	Description	Schema
Query	**author_id** *optional*	Google Scholar id of author	string

Responses

HTTP Code	Schema
201	No Content

Tags

- publications

GET /publications/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this publication.	integer

Responses

HTTP Code	Schema
200	Publication

PUT /publications/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this publication.	integer
Body	**data** *required*		Publication

Responses

HTTP Code	Schema
200	Publication

Tags

• publications

DELETE /publications/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this publication.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

• publications

PATCH /publications/{id}/

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this publication.	integer
Body	**data** *required*		Publication

Responses

HTTP Code	Schema
200	Publication

Tags

- publications

POST /ratings/

Description

Rating can be an integer in [0,10]. The from_user field is automatically the requesting user.

Parameters

Type	Name	Schema
Body	**data** *required*	Rating

Responses

HTTP Code	Schema
201	Rating

Tags

- ratings

GET /ratings/

Description

Users can only see the ratings they created.

Parameters

Type	Name	Schema
Query	**to_user** *optional*	string

Responses

HTTP Code	Schema
200	< Rating > array

Tags

- ratings

GET /ratings/{id}/

Description

Users can read, update, partial_update or delete only the ratings that themselves created.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this rating.	integer

Responses

HTTP Code	Schema
200	Rating

Tags

- ratings

PUT /ratings/{id}/

Description

Users can read, update, partial_update or delete only the ratings that themselves created.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this rating.	integer
Body	**data** *required*		RatingUpdate

Responses

HTTP Code	Schema
200	RatingUpdate

Tags

- ratings

DELETE /ratings/{id}/

Description

Users can read, update, partial_update or delete only the ratings that themselves created.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this rating.	integer

Responses

HTTP Code	Schema
204	No Content

PATCH /ratings/{id}/

Description

Users can read, update, partial_update or delete only the ratings that themselves created.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this rating.	integer
Body	**data** *required*		RatingUpdate

Responses

HTTP Code	Schema
200	RatingUpdate

Tags

- ratings

POST /register/

Description

Registers a new user

Parameters

Type	Name	Schema
Body	**data** *required*	Register

Responses

HTTP Code	Schema
201	Register

Tags

- register

POST /reports/

Description

Only signed-in users can create reports. REPORT_TYPES = ["Disturbing other users", "Sharing unrelated or disturbing posts", "Spam", "Fake Profile", "Stolen Account"]

Parameters

Type	Name	Schema
Body	**data** *required*	Report

Responses

HTTP Code	Schema
201	Report

Tags

- reports

GET /reports/

Description

Only admins can view reports.

Parameters

Type	Name	Schema
Query	**reported_user** *optional*	string

Responses

HTTP Code	Schema
200	< Report > array

Tags

- reports

GET /reports/{id}/

Description

Only admins can view reports.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this report.	integer

Responses

HTTP Code	Schema
200	Report

Tags

- reports

DELETE /reports/{id}/

Description

Only admins can delete reports.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this report.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- reports

POST /search/

Description

Execute a search with a string

Parameters

Type	Name	Schema
Body	**data** *required*	SearchRequest

Responses

HTTP Code	Schema
201	SearchRequest

Tags

- search

POST /tags/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Schema
Body	**data** *required*	Tag

Responses

HTTP Code	Schema
201	Tag

Tags

- tags

GET /tags/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Responses

HTTP Code	Schema
200	< Tag > array

Tags

- tags

GET /tags/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this tag.	integer

Responses

HTTP Code	Schema
200	Tag

Tags

- tags

PUT /tags/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this tag.	integer
Body	**data** *required*		Tag

Responses

HTTP Code	Schema
200	Tag

Tags

- tags

DELETE /tags/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this tag.	integer

Responses

HTTP Code	Schema
204	No Content

Tags

- tags

PATCH /tags/{id}/

Description

This viewset automatically provides `list`, `create`, `retrieve`, `update` and `destroy` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this tag.	integer
Body	**data** *required*		Tag

Responses

HTTP Code	Schema
200	Tag

Tags

- tags

GET /users/

Description

This viewset automatically provides `list` and `detail` actions.

Parameters

Type	Name	Schema
Query	**username** *optional*	string

Responses

HTTP Code	Schema
200	< UserPrivate > array

Tags

- users

GET /users/get_collaborator_recommendation/

Description

This viewset automatically provides `list` and `detail` actions.

Parameters

Type	Name	Description	Schema
Query	**project_count** *optional*	Number of users requested	integer
Query	**project_id** *optional*	Project id to get recommendations	integer
Query	**username** *optional*		string

Responses

HTTP Code	Schema
200	< UserFull > array

Tags

- users

GET /users/{id}/

Description

This viewset automatically provides `list` and `detail` actions.

Parameters

Type	Name	Description	Schema
Path	**id** *required*	A unique integer value identifying this user.	integer

Responses

HTTP Code	Schema
200	No Content
